

Strategic Plan 2025

March 2019

AWC Strategic Plan

Spotlight!

OPEN EDUCATIONAL RESOURCES

The second objective of the Accessibility Team is focused on offering open educational resources (OER) in 50% of AWC classes. The team is happy to report that in the Fall 2019 schedule, students will be able to search for classes with an

OER filter. OER offers no - cost or low-cost (less than \$40) textbooks.

Dr. Joann Chang has been leading the group on their diligent work and plans to attend the Regional OER Conference on February 22nd and 23rd.

2019 Innovation Funds Update

AC&S Mural Project

AWC San Luis Art Club, Art Curiosity & Secret mural is looking amazing, have you stopped by to say hi?

Implementation Teams

AGILITY

The Agility Team has reviewed the [responses](#) to our January “Deal Makers & Breakers” workshop. The one-council model was obviously preferred over the three-council model. With that preference and the other comments and concerns in mind, the team is currently drafting the shared governance document. We anticipate it being composed of 10-12 sections and being 30 or more pages long. Our goal is to have the first draft ready and out for comments and feedback in March or early April. If anyone has any further concerns or comments, contact the [committee](#).

TECHNOLOGY

The Technology team met with Cabinet on January 12th and received their support for creating SOCIIT (Strategic Oversight Committee for Instructional and Informational Technology). SOCIIT is a tri-chaired committee with representation from each employee classification. The Technology Team is creating the charter with more details and will be actively seeking participation from across the campus. If you are interested with serving on the committee please contact them via [email](#).

ACCESSIBILITY

On Tuesday, March 5th, Dr. Eric Lee will be live on [Z93 and Outlaw Country](#) for the Toro Tuesday segment on behalf of the Data Driven Committee. It’s a different approach on reaching out the community to get their feedback, the main target audience being the 25+ student demographic. The committee also plans to have a booth to gather information at the [2019 Women’s Expo](#) and [Tunes & Taco’s Festival](#).

PROSPERITY

Prosperity group members facilitated during Professional Development Day on topic areas that include initiatives to increase student success and recognizing a new educational evolution/prior learning assessment around the state. Both topic areas spoke to the value of student experiences outside of the classroom and how those experiences enhance student recruitment, retention and success.
