

ARIZONA WESTERN COLLEGE
SYLLABUS

BIO 205 MICROBIOLOGY/GE

Credit Hours: 4 Lec 3 Lab 4

PREREQUISITE: BIO 181 and complete ENG 101 or 107. CHM 130 or CHM 151 highly recommended.

COURSE DESCRIPTION

Study of microorganisms including their morphology, metabolism, genetics, classification, and effects on human life and the environment. Laboratory sessions cover basic procedures in microbiology culminating in the identification of unknown bacterial samples.

1. COURSE GOAL

- 1.1 Discuss how microbiology has contributed to our current knowledge of living things and processes.
- 1.2 List several contributions of microorganism to our lives, the lives of other organisms, and the world around us.
- 1.3 Apply concepts learned in order to make intelligent decisions concerning problems and ethical issue of modern life: antibiotic use, food production, new technologies in medicine, and genetic engineering.
- 1.4 Write effectively to communicate the concepts learned in this course.

2. OUTCOMES

Upon satisfactory completion of this course, students will be able to:

- 2.1 discuss history and the scientific method as they relate to microbiology.
- 2.2 summarize the trees of life used to classify all living things, and apply the scientific rules of taxonomy and binomial nomenclature to categorize and name various microorganisms.
- 2.3 compare and contrast the overall cell structure and functions of prokaryotes and eukaryotes.
- 2.4 describe the mechanisms of enzyme action and inhibition.
- 2.5 summarize the processes of aerobic respiration, anaerobic respiration, and fermentation.
- 2.6 draw the growth curve and summarize what is occurring at each phase, and estimate the number of microorganisms in a sample.
- 2.7 describe the effects of antimicrobials and other control methods on prokaryotes, eukaryotes, and viruses.
- 2.8 summarize the processes of DNA replication, transcription, and translation.
- 2.9 discuss how natural transformation, transduction, and conjugal DNA transfer can induce genetic exchange and diversity in prokaryotes.
- 2.10 describe the chemical and physical structure of bacteriophages and animal viruses, as well as the steps by which they replicate.
- 2.11 describe the innate immune systems and their functions.
- 2.12 describe the adaptive immune systems and their functions.
- 2.13 summarize the role microbes play in the environment and how they affect humans specifically.
- 2.14 summarize how pathogenic microorganisms cause disease.
- 2.15 perform basic microbiology laboratory techniques including use of a bright-field microscope, aseptic technique, inoculation, sub-culturing, staining, and interpretation of biochemical reactions.
- 2.16 practice safe microbiology, using appropriate protective and emergency procedures.

3. AWC GENERAL EDUCATION (GE) CATEGORY & CRITERIA
NATURAL SCIENCES

- How to describe, explain, and predict natural phenomena using scientific, logical, and quantitative reasoning and empirical evidence from observation and experimentation
- The use of experimentation and/or observation to study natural phenomena, using the scientific method
- The history of scientific development
- How to critically evaluate scientific information, including visual displays and quantitative data

4. METHODS OF INSTRUCTION

- 4.1 Lectures
- 4.2 Laboratory exercises
- 4.3 Videos
- 4.4 Classroom demonstrations
- 4.5 Class discussions
- 4.6 Instructional technology

5. LEARNING ACTIVITIES

- 5.1 Textbook reading
- 5.2 Guest Speakers
- 5.3 Field Trips
- 5.4 Laboratory activities
- 5.5 Writing assignments

6. EVALUATION

- 6.1 Homework assignments
- 6.2 Laboratory exercise
- 6.3 Quizzes
- 6.4 Exams

7. STUDENT RESPONSIBILITIES

- 7.1 Under AWC Policy, students are expected to attend every session of class in which they are enrolled.
- 7.2 If a student is unable to attend the course or must drop the course for any reason, it will be the responsibility of the student to withdraw from the course. Students who are not attending as of the 45th day of the course may be withdrawn by the instructor. If the student does not withdraw from the course and fails to complete the requirements of the course, the student will receive a failing grade.
- 7.3 Americans with Disabilities Act Accommodations: Arizona Western College provides academic accommodations to students with disabilities through AccessABILITY Resource Services (ARS). ARS provides reasonable and appropriate accommodations to students who have documented disabilities. It is the responsibility of the student to make the ARS Coordinator aware of the need for accommodations in the classroom prior to the beginning of the semester. Students should follow up with their instructors once the semester begins. To make an appointment call the ARS front desk at (928) 344-7674 or ARS Coordinator at (928) 344-7629, in the College Community Center (3C) building, next to Advising.
- 7.4 Academic Integrity: Any student participating in acts of academic dishonesty—including, but not limited to, copying the work of other students, using unauthorized “crib notes”, plagiarism, stealing tests, or forging an instructor’s signature—will be subject to the procedures and consequences outlined in AWC’s Student Code of Conduct.

- 7.5 Texts and Notebooks: Students are required to obtain the class materials for the course.
- 7.6 Arizona Western College students are expected to attend every class session in which they are enrolled. To comply with Federal Financial Aid regulations (34 CFR 678.21), Arizona Western College (AWC) has established an Attendance Verification process for "No Show" reporting during the first 10 days of each semester.
- Students who have enrolled but have never attended class may be issued a "No Show" (NS) grade by the professor or instructor and receive a final grade of "NS" on their official academic record. An NS grade may result in a student losing their federal financial aid.
- For online classes, *student attendance in an online class is defined as the following* (FSA Handbook, 2012, 5-90):
- Submitting an academic assignment
 - Taking an exam, an interactive tutorial or computer-assisted instruction
 - Attending a study group that is assigned by the school
 - Participating in an online discussion about academic matters
 - Initiating contact with a faculty member to ask a question about the academic subject studied in the course
