

Making an LTI's available in your course:

Some LTI's, like Zoom, Cengage, Macmillian Learning, etc., are not initially available on the Menu Bar. To add or remove the availability of these LTI's in your course, please do the following:

Got to the course you wish to make changes on (you will need to do this for each of your courses) and click on the "Settings" icon at the bottom of the menu:

Welcome!

Add a short introductory (welcome) message. Praesent libero. Sed cursus ante dapibus diam.

About This Template: This template is designed for an Overview & To Do List and action verbs.

Navigation Tip

The left-side navigation menu includes a ' [Instructor](#) page, learning content, and other resources.

If you are accessing this course from a mobile device, the navigation menu will be simplified.

Quick Access

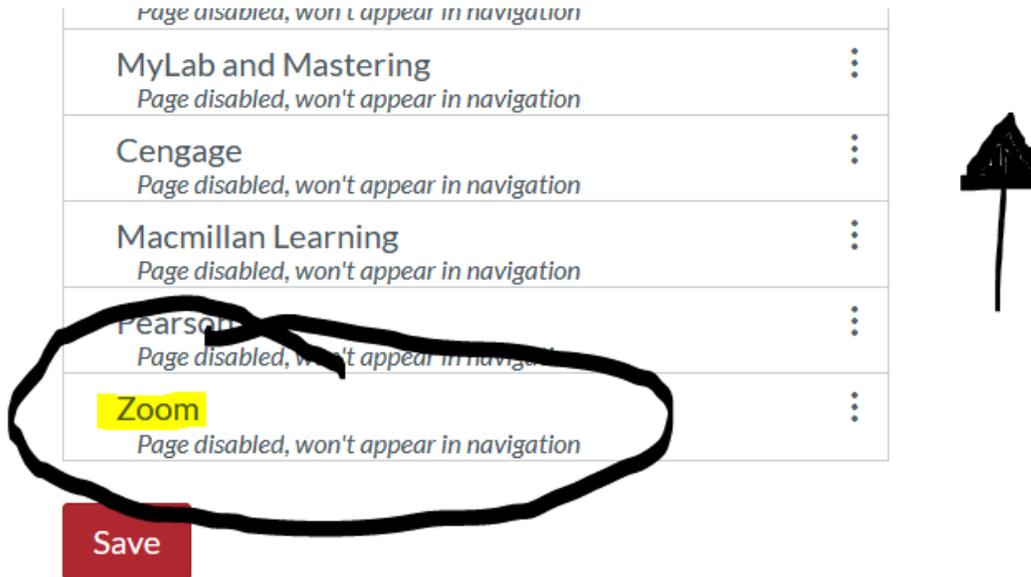

You will then click on “Navigation” on the top menu bar:

Drag and drop items to reorder them in the course navigation.

You will then need to drag and drop items to reorder them in the course navigation menu

[Course Details](#)[Sections](#)[Navigation](#)[Apps](#)[Feature Opt](#)

Drag and drop items to reorder them in the course navigation.

ADDING ZOOM:

Once you add Zoom to your course and click on it, you will see training information on the right-hand side:

A screenshot of the Zoom configuration page in Canvas LMS. The page title is 'Fall 2020 Intro to Comp Info Syst/GE (CIS-120-001)'. A warning message states: 'For improved security the Approved Domains section of the LTI Pro configuration page'. The Zoom logo is displayed, along with the text 'Your current Time Zone is (GMT-07:00) Arizona.' and a link 'All My Zoom Meet'. There are four tabs: 'Upcoming Meetings', 'Previous Meetings', 'Personal Meeting Room', and 'Cloud Recordings'. A checkbox labeled 'Show my course meetings only' is present. Below is a table with columns 'Start Time', 'Topic', and 'Meeting ID'. The table is empty, showing 'No Data'. On the right side, there is a 'Zoom' section with a right-pointing arrow. It contains the heading 'Enable face-to-face connection' and a paragraph: 'Zoom is a real-time video conferencing tool that brings teachers and students together. You can schedule and run video meetings directly within Canvas by adding a Zoom link in a Canvas Course, Course Announcement, Module, or via Calendar.' Below this are six FAQ items, each with a question mark icon: 'How do I add Zoom to a course?', 'How do I schedule a Zoom video meeting?', 'How do I start a meeting?', 'How do I record a meeting?', 'How do I know if students have joined the meeting?', and 'How do I mute and unmute all participants?'. The last item is partially cut off.
